

WHIDDON AGED CARE

■ OFFERING OUR ELDERLY ALL THE COMFORTS OF HOME.

With quality aged care becoming increasingly sought after, the Whiddon Group's \$21-million, 110-bed Residential Aged Care Facility is a welcome addition to the Grafton landscape. The massive build called for intensive collaboration between the Whiddon Group, Woollam Constructions, Jackson Teece Architects, and fabricators, Big River Glass. The result is a testament to great workmanship, smart thinking, and exceptional materials and products.

To give the front lobby a real 'wow' factor, the Elevate™ Series 936 FrontGLAZE 225mm Commercial framing system was used. Not only was it easy to install but it also opened the area up to plenty of natural light, creating a warm and welcoming space for residents and their guests. Adding to the facility's great first impressions, the lobby leads to a large courtyard through a stunning five-panel bifold door with handy louvres for ventilation.

One of the biggest challenges was juggling the build while residents and staff were still using the facility. The problem was solved by splitting the project into two stages. Stage 1 included building a brand new facility into which residents were moved upon completion. Stage 2 included the demolition and rebuilding of the old facility. Deadlines were drastically shifted on more than one occasion and flexibility was the name of the game. The adaptable nature of the AWS windows, doors and external strip drains was central to the smooth-running of the project.

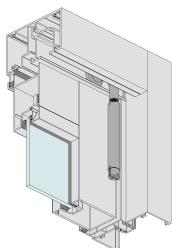

By combining the AWS Commercial Series with the Residential range, the builder, architect and fabricator have done more than just create a state-of-the-art facility; they've built a true home away from home.

■ SERIES 411 VIEWMASTER™ BI-FOLD DOOR (TOP HUNG)

- × With The luxurious ViewMaster™ top hung bi-fold door has been designed to accommodate 50mm thick, heavy duty framing with lightweight movement.
- × The amazing design, twin stainless steel bearing rollers and heavy-duty overhead tracks mean you can easily open and close panels up to a massive 3000mm high.
- × All panels can be lifted or lowered easily with a flat screwdriver for precision adjustment and flawless operation.
- × Choose from a variety of great lever and lock options, including multi-point locking for added security.
- × These doors have been successfully tested to resist 450Pa water, meaning they are suitable for any environment throughout Australia.
- × ViewMASTER™ bi-fold doors can also be fitted with the clever Centor Eco Screen for a retractable and discreet environmental barrier.

Big River Glass are leading manufacturers of contemporary architectural window and door systems. Our team will provide you with technical advice, design expertise and quality workmanship to ensure the highest quality products for your project

2D & 3D CAD Files Available | Download from specifyaws.com.au to use in your projects.
